ADDITIONAL REPORT NOTES

Test method have been validated to meet regulatory standards. Total Potential THC = (THCa x 0.877) + (Δ9THC) + (Δ8THC). Total Potential CBD = (CBDa x 0.877) + (CBD). Total Cannabinoids is summation of all tested and detectable cannabinoids. Samples are gravimetrically prepared using qualified balances that are calibrated annually by Mettler-Toledo using NIST-traceable weights. Verification of calibration is performed routinely (e.g. weekly) using NIST-traceable to ensure safe and accurate weighting processes between manufacture performed calibration. Individual balances have been assigned minimum weights taking into consideration the balance and environmental conditions to ensure weighting complies with acceptable tolerances. Cannabinoids for hemp flower and trim is analyzed and reported as received unless requested otherwise. Unless otherwise specified, all QC samples performed within specifications established using validated test methods. Reported results refer exclusive to items tested and have been tested by Sante Laboratories, unless specified otherwise. Test analysis was performed by an ISO/IEC 17025:2017 accredited laboratory.

LEGEND KEY

N/A: Not Applicable
ND: Not Detected
NMT: No More Than
NLT: No Less Than
LOD: Limit of Detection
LOQ: Limit of Quantitation
LFIR: Laboratory Failure Investigation Report
RT: Retention Time
RRT: Relative Retention Time
USP: United States Pharmacopeia
ID: Identification
CV: Coefficient of Variation
CFU: Colony Forming Units
LR: Lot Release
LNCR: Laboratory Non-Conformance Report
RP-UHPLC-DAD: Reverse Phase Ultra High-Performance Liquid Chromatography with Diode Array Detector
MS/MS: Mass Spectroscopy (Quadrupole)
PPM: Parts Per Million
PPB: Parts Per Billion
DLS: Dynamic Light Scattering
MG: Milligrams
G: Grams
MCG: Micrograms
NM: Nanometers
PDI: Polydispersity Index
ML: Milliliters
ISO: International Organization for Standardization
